

 **ARGO**TM

Introducing ARGOTM by DigiLens –
the future of wearable computing.

ARGO smartglasses feature our best-in-class crystal waveguides with industry-leading minimal eye glow and a small footprint, resulting in a more user-friendly and socially acceptable product.

Key Benefits

The DigiLens difference: we're delivering smartglasses with scalability and quality at cost-effective price point.

Reduce costs

Save money by overcoming the barriers of time, distance, and training to deliver expertise when and where it's needed most.

Remote expert

Enable real-time access to remote experts for training, guidance, supervision, and quality assurance.

Scale your workforce

Extend the availability and capacity of your workforce through remote training and real-time supervision.

Improve safety

Increase situation awareness through real-time connectivity to environmental and other sensor platforms and devices.

Improve productivity

Increase workforce productivity, reduce downtime, and minimize delays through remote collaboration.

Work smarter

Blend the digital and physical worlds with access to real-time data visualizations.

System Features

Key Features

Display

Efficiency and uniformity.

Compute

Standalone full mobile compute.

Camera

Photorealistic image quality.

Audio

Multiple microphones designed to pick up the user's voice in a noisy environment.

Connectivity

Ability to use the device in any environment.

Design & Safety

Rugged industrial and enterprise design with socially acceptable form factor.

DigiOS

Fully-integrated compatibility for the future of mobile computing.

All product specifications are subject to change to improve reliability, function, or design.

Target Use Cases

ARGO improves communication and collaboration by creating a digitally-enabled workforce across a range of industries, empowering frontline workers from the field to the operating room.
